

B Right flexion and left extension

The diagram illustrates the experimental setup. A central PMRF (Pulsed Magnetic Resonance Field) is shown, connected to two subjects, Left and Right. Each subject has a Stimulus (Stim) and a Control Pulse Generator (CPG) (IF for Left, rF for Right). The subjects are also connected to a feedback loop (IFmn for Left, rFmn for Right). The diagram illustrates the timing of the stimuli and the control pulses.
